Co-organized by Reed Exhibitions and China Paper and Pulp Industry Chamber of Commerce (CPICC), SinoPaper South 2022 comprehensively displays packaging paper, culture & commercial printing paper, specialty paper, and other specialty paper and board. The 2022 edition, by leveraging RX's domestic and overseas market resources and open to all professionals from package printing factory, folding carton printing factory, traders & distributors, end-users and designer companies, is going to invite the purchasing decision-makers of paper demanding enterprises at home and abroad.

Alongside the on-site show, a series of high-quality activities will be organized including the Paper Industry Development Forum and the Paper E-commerce Purchasing Festival. etc., to directly target customers for paper industry exhibitors, build a comprehensive three-dimensional communication and exchange platform amongst professional visitors, and help exhibitors develop markets and establish business and sales networks.

STRIVE TO CHANGE THE TRADITIONAL MARKETING MODE OF THE INDUSTRY

As one of the series packaging exhibitions under WEPACK (World Expo of Packaging Industry), SinoPaper South 2022 will be held concurrently with seven exhibitions such as SinoCorrugated South 2022, SinoFoldingCarton 2022 and PACKON 2022, with an ultra large exhibition area of 160,000 sqm and 1,500 exhibitors. It is expected to attract over 100,000 professional buyers at home and abroad. 8-in-1 mega-show covers the upstream, middle and downstream industrial chain of paper, and builds a strong business communication platform for paper mills, paper distributors, packaging enterprises and end-users to face the communication, meet the needs, expand the buyer groups and listen to the voice of users.

WHY DO REMOTE BOOTH

Under the context of pandemic, overseas trade has been suspended. Reed Exhibitions is one of the few organizers who insist on overseas market expansion for exhibitors with heavy investment despite the pandemic. In 2022, we will launch remote booth will break the spatial boundary to improve the communication efficiency
