Ladies and Gentleman

On behalf of Reed Exhibitions, I welcome you to SinoCorrugated 2019, SinoFoldingCarton 2019, China Packaging Container Expo 2019, SinoFlexPack 2019 and SinoPaper 2019. Asia-Pacific's professional manufacturing expos in the printing and packaging industry! As one of the leading organizers of trade exhibitions, consumer events, conferences and meetings, Reed Exhibitions has over 500 events in more than 30 countries covering 43 industry sectors. Wherever there are opportunities for market growth or a need to explore fresh potential, we are there.

In 1994, the Paris International Corrugated Expo, organized by Reed Exhibitions, was founded. Since then, Reed Exhibitions has been focusing on the global printing and packaging market for more than 20 years. In 2001, SinoCorrugated was founded in Shanghai. In 2004, SinoCorrugated South was founded in Dongguan. In 2006, SinoFoldingCarton joined in. After constant development of almost 18 years, Reed Exhibitions has gathered more than 300,000 data of global packaging and printing industry professionals, and gradually expands to packaging container, flexography, label and other fields - connecting the whole industry chain. SinoCorrugated, SinoFoldingCarton and other relevant shows have won the reputation as one of the world leading manufacturing shows within the printing and packaging industry in terms of the vast scale and grand impact.

This year, SinoCorrugated 2019, SinoFoldingCarton 2019, China Packaging Container Expo 2019, SinoFlexPack 2019 and SinoPaper 2019 are held concurrently in the same venue to form a 5-in-1 mega expo, providing a higher profile, exposure to a larger cross-section of the printing and packaging industry and precious connections to key players in dynamic sectors. The exhibition spans 110,000 square meters to showcase more than 1,800 high-end, cost-effective manufacturing equipment and more than 1,000 kinds of consumables. More than 80,000 local and international industry professionals, buyers and end-users are expected to come together to forge partnerships, place orders and lay eyes on cutting-edge equipment and the latest industry trends. More than 200 local and international industry associations and media partners are here to join the grand event this year.

I would like to express my sincere gratitude to each and every one of you here for your exceptional support over the years. I would like to thank the China Packaging Federation (CPF), the Asian Corrugated Case Association (ACCA), the Corrugated Box Manufacturers' Association (CBMA), the Federation of Corrugated Box Manufacturers of India (FCBM), the Malaysian Corrugated Carton Manufacturers' Association (MACCMA), the Indonesian Corrugated Cardboard Industries Association (PICCI), the Korea Corrugated Packaging Case Industry Association (KCCA), the Chinese Taipei Corrugated Case Association (CTCCA), the Hong Kong Corrugated Paper Manufacturers' Association (HKCPMA), the Vietnam Packaging Association (VPA), the Thai Corrugated Packaging Association (TCPA), the Thai Packaging Association (TPA), the All India Federation of Master Printers (AIFMP), the Offset Printers' Association India (OPA), the Lanka Corrugated Carton Manufacturers Association (LCCMA), the Paper Products Committee of the China Packaging Federation, the Flexographic Branch of the China Printing Technology Association, and many more associations for your support. Your constant support and trust have made an irreplaceable contribution to our continuous success.

主办单位致辞

Don't miss out the opportunity to participate in several onsite activities this year. Sino Corrugated - 2019 Sino Corrugated Development Forum, World Corrugated Awards, Whole chain of Soft Flex Pack Summit, Korea Country Day, India Country Day, Vietnam Country Day, 2019 China Packaging Brand Innovation Summit and many more fabulous events all are here today for you to learn about latest technologies, innovative industry solutions, emerging markets and current developing trends. It will be a great opportunity to meet face-to-face with industry peers and gain valuable business contacts.

As a must-attend manufacturing exhibition of the printing and packaging industry, the 5-in-1 mega expo this year has integrated into a one stop business platform for international face-to-face communication and trade cooperation for both exhibitors and visitors, providing valuable business opportunities to create a win-win situation, thus to boost the entire industrial development. On behalf of Reed Exhibitions, I wish you profitable business and an inspiring and wonderful time at SinoCorrugated 2019, SinoFoldingCarton 2019, China Packaging Container Expo 2019, SinoFlexPack 2019 and SinoPaper 2019.

主办单位致辞

郑智生
总裁
励展博览集团大
中华区

女士们、先生们：

诚挚欢迎各位莅临参加亚太地区印刷包装行业专业制造盛会—2019中国国际瓦楞展、2019中国国际彩盒展、2019中国包装容器展、2019上海国际软包展和2019上海国际纸展。励展博览集团作为世界专业的贸易和消费类展会、研讨会等活动的主办机构之一，每年在全球30多个国家举办500多个展会项目，涵盖43个行业。在任何存在市场增长机遇或需要开发新潜力的地方，都会有我们的身影。

自1994年主办第一届巴黎瓦楞展起，励展博览集团对全球包装市场布局已长达20余年。2001年中国国际瓦楞展在上海诞生、2004年在东莞创办华南国际瓦楞展、2006年主办中国国际彩盒展…深耕中国市场18年，励展博览集团积累起30余万全球包装及印刷行业专业数据库，并逐步将展会拓展至包装容器、柔印、标签等领域，贯通包装印刷全产业链。庞大的规模和深远的影响，使励展博览集团主办的瓦楞展、彩盒展等成为享誉全球的包装和印刷专业制造展览会之一。

今年，中国国际瓦楞展、中国国际彩盒展、中国包装容器展、上海国际软包展和上海国际纸展在同一展馆同期举办，形成贯通印刷包装全产业链的五展同期规模盛会，励展博览集团将为所有参与者提供一个高层次贸易对接及一站式技术交流平台。本届展会总占地面积近110000平方米，将展出1800多台高端、高性价比的制造设备和1000多种耗材。预计将吸引18万多名国内和国际印刷包装专业人士、买家汇聚一堂，缔结贸易订单，参观前沿设备，了解新近行业趋势。与此同时，今年有200多家国内和国际行业协会和媒体参与这一大型盛会。

在此，衷心感谢这些年给予我们大力支持的国内和国际协会。感谢中国包装联合会(CPF)、亚洲瓦楞纸箱协会(ACCA)、新加坡瓦楞纸箱制造商协会(CBMA)、印度瓦楞纸箱制造商联合会(FCBM)、马来西亚瓦楞纸箱制造商协会(MACCMA)、印度尼西亚瓦楞纸板工业协会(PICCI)、韩国瓦楞包装工业协会(KCCA)、台湾区纸器工业同业公会(CTCCA)、香港瓦通纸业厂商会(HKCPMA)、越南包装协会(VPA)、泰国瓦楞包装协会(TCPA)、泰国包装协会(TPA)、全印度印刷商联合会(AIFMP)、印度胶印行业联合会(OPA)、斯里兰卡瓦楞纸板厂商协会(LCCMA)、中国包装联合会纸制品包装委员会、中国印刷技术协会柔印分会以及众多其他协会的支持。你们不遗余力的支持和信任为我们持续的成功做出了不可磨灭的贡献。

The Asociación de Corrugadores del Caribe, Centro y Sur América (ACCCSA) has the honor to express its congratulations for the 2019 edition of SinoCorrugated as well as the World Corrugated Awards. We believe that the Shanghai fair is an effective channel where companies from our industry can get to know more about the latest technology and exchange ideas to learn more about the latest global trends in the corrugated market. Through Events like the above mentioned manufacturers from our region are able to optimize their manufacturing process, also thanks to the contribution of the producers of machines and equipment from Asia. We look forward to get to know more about new launches of machinery and will encourage our members to join SinoCorrugated 2019 in order to take advantage of one of the industry's most effective channels for promoting advanced technologies and discovering new commercial partners.

我们相信，这个在上海的展览是一个有效的渠道，让我们行业的企业更多地了解新的技术，交流思想，更多地了解全球瓦楞市场的新趋势。

ACCCSA非常感激能够参加2019中国国际瓦楞展，这有助于我们地区的制造商能够优化他们的生产流程，得益于来自亚洲的机器和设备制造商的贡献。我们期待着更多地了解新机器的发布，并鼓励我们的成员加入2019中国国际瓦楞展，以利用该行业有效的推广先进技术和发现新的商业合作伙伴的渠道。

It is heartening to learn that Sino Corrugated Exhibition will be held from 8th April 2019 to 11th April 2019 at New International Exhibition Centre, Shanghai, China. I am given to understand that SinoCorrugated 2019 will run concurrently with SinoFoldingCarton and PACKCON, and two new shows i.e. SinoPaper and SinoFlexPack will be introduced to the Global converting community. I am also delighted to know that the mega expo will bring together over 1100 established brands to display 1800 high-end, cost-effective pieces of machinery, ancillary equipment and consumables across an exhibition area of over 110,000sqm. The exhibition will highlight the significance of innovation, upgrading, integration and development to the industry against the background of accelerating information, dissemination and prevailing development of green printing.

As one of the leading commercial showcases for Folding Carton post-print equipment, consumables, technologies and services within the Asia-Pacific region, SinoFoldingCarton 2019 will bring together high-end Folding Carton packaging and printing enterprises from across Asia. It also provides opportunities for face-to-face exchange and communication between exhibitors and visitors with strong purchasing power and intent to buy. The event will bring together hundreds of world class suppliers to feature a concentration of the leading flexible packaging equipment, consumables, supporting services and latest trends.

We look forward to cooperate with Reed Exhibitions and will encourage and recommend our members to join Sino Corrugated in order to take advantage of one of the industry's most effective channels for promoting advanced technologies and discovering new commercial partners within the folding carton industry. I am sure that, through SinoFoldingCarton & SinoCorrugated, visitors can take advantage of the above-mentioned show value. We are looking forward to the show edition and wish SinoFoldingCarton & SinoCorrugated 2019 a great success!

很高兴得知新一届中国国际瓦楞展将于2019年4月8日至2019年4月11日在中国上海新国际展览中心举行。据了解，2019中国国际瓦楞展将与中国国际彩盒展、中国包装容器展同时举办，此外还将推出新的上海国际纸展和上海国际软包展两大新的展览品牌。我很高兴地得知，本届展会将汇集1100多个知名品牌，在11万多平方米的展区内展出1800件高端、性价比高的机械、配套设备和耗材。本届展会突出创新，升级，整合和发展，对行业具有重要意义。

亚太地区专业的印后设备、耗材、技术和服务的商业展示平台之一，2019中国国际彩盒展将汇聚亚洲各地众多知名的包装印刷企业。展会还为参展商和有较强购买力、购买意向的买家提供面对面交流互动的机会。此次活动将汇集数百家海内外知名供应商，集中展示先进前沿的包装设备、耗材、配套服务和新趋势。

我们期待与励展博览集团合作，并鼓励我们的会员参观2019中国国际瓦楞展等同期五展，以便利用有效的渠道，在瓦楞、彩盒行业内推广先进技术和发现新的商业合作伙伴。我相信，观众买家一定能够通过2019中国国际瓦楞展等同期五展实现并寻求价值。我们期待着展会的到来，并祝愿2019中国国际瓦楞展等同期五展取得圆满成功！

The Federation of Corrugated Box Manufacturers of India (FCBM) is feels privileged to endorse SinoCorrugated 2019 which will be held from April 08-11, 2019 at SNIEC, Shanghai, China. Over the years SinoCorrugated has developed as the premier event showcasing the latest technologies in corrugated packaging from all over the world under one roof.

Year on year large numbers of members of FCBM have been visiting SinoCorrugated with a focus on upgrading their machinery as well as expansion facilities by additional manufacturing lines. The exposure to the wide variety of machinery manufactures at this Exhibition given them very valuable insights into the future of corrugated packaging. It is also an excellent platform for a face-to-face interaction between exhibitors and visitors. Our members have always had a positive feedback after each exhibition and have gained in knowledge and experience with every visit. They have been able to gorge new relationships and catch up with their existing suppliers.

We look forward to associate with Reed Exhibitions and will encourage our members to participate in large numbers in SinoCorrugated 2019 in order to take advantage of one of the industry's most premier events for global corrugated printing and packaging industry. We are also confident that our close partnership will make the event a win win situation for the exhibitions as well as visitors from FCBM. Our members look forward to experience Shanghai one of the most modern cities of the world on the sidelines of the events. We are eagerly looking forward to this event and wish Reed Exhibitions & SinoCorrugated 2019 a great success!

China Packaging Federation and Reed Exhibitions have been old friends for many years. In 2019 we will continue to give full support to the exhibition as always and will co-organize PACKCON with Reed Exhibitions. SinoCorrugated, SinoFoldingCarton and PACKCON are all great annual events to the packaging industry. This year we've added SinoFlexpack and SinoPaper. The five exhibitions will be held during the same period, making the exhibition scale even bigger. Reed Exhibitions has always been sticking to the general direction of threading the whole container processing industry chain. With richer content, the exhibition has provided domestic and overseas packaging and printing enterprises with diversified, personalized procurement options. It is also a professional platform for communication and learning of industry insiders. We hope paper packaging enterprises will continue to improve equipment and technological levels through learning and communication to strengthen competitiveness, and in the meantime, to promote the quality development of the paper packaging industry by participating in the rich activities of the exhibition, visiting innovative exhibits and exchanging ideals on industry hot spots and focuses. Through many years' rapid development, China has become a packaging manufacturing power and also a big packaging consumer, and many packaging manufacturing equipment and packaging products have emerged and been sold all over the world. China Packaging Federation, packaging enterprises, packaging technicians and packaging management have, with hard work and sincere services, made positive contributions that cannot go unnoticed. Here I'd like to express my heartfelt respect to packaging workers who have worked hard! From April 8 to 11, 2019, the five co-located exhibitions organized by Reed Exhibitions will be held. We are looking forward to their more wonderful content, as well as quality, energy-saving and environmentally-friendly manufacturing equipment and consumables they will showcase to audiences. As the exhibition approaches, I'd like to thank Reed Exhibitions for its continuous support to the packaging industry. We wish the exhibition a great success and the corrugated industry a thriving future!

Reed Exhibitions is one of the most famous exhibition organizers in the world. For a long time, Reed Exhibitions and China Packaging Federation Paper Products Committee have kept a close cooperative relationship in various aspects such as activity, conference, training and exhibition. Since the second half of 2018, the whole industry has entered into the adjustment period, with the global economy slowing down, environmental protection pressure going up, the price of body paper fluctuating and market competition intensifying, in addition to the impact of the trade war, the insufficient capital investment in the real economy and looming employment problems. In that context, Reed Exhibitions has, by comprehensively integrating industry resources and making use of its excellent operation team and rich experience in operations, created series valuable exhibitions that integrate visiting, learning, inspection and communication and focus on frontier information and advanced technologies in the paper packaging industry to help printing and packaging enterprises get a clear understanding of the changes and challenges faced by the whole industry and discuss the ways out.

励展博览集团是世界范围内知名的展会主办机构。长期以来，一直与中国包装联合会纸制品包装委员会在活动、会议、培训、展会等多方面保持着紧密的合作关系。2018年下半年以来，随着全球经济下滑，环保压力倍增，原纸价格不稳定以及市场竞争加剧，特别是贸易战的冲击，加上实体供血不足，就业隐患也若隐若现，从“稳中向好”到“稳中有忧”、“稳中有变”，全行业进入了调整期。在这一背景下，由励展博览集团全面整合行业资源，基于优秀运营团队和丰富运营经验打造的集参观、学习、考察、交流于一体的极富价值的系列展会，聚焦纸制品包装的前沿资讯和先进技术，帮助印刷包装企业认清当前行业整体遇到的变局与困局，共同探讨破局之路。

In the past two years, the fast-changing international and domestic market environment has brought big challenges to packaging and printing enterprises. Faced with such a situation, to achieve automated and intelligent production of mechanical equipment has become the only way for packaging and printing enterprises to break through shackles, achieve transformation and upgrading and develop and grow stronger. We are very happy to see that since its establishment, SinoCorrugated has always been moving forward together with the industry and has provided a window for domestic packaging enterprises to connect to the world and the future. The Shanghai Packaging Technology Association has always been paying attention to the exhibitions relating to the packaging industry organized by Reed Exhibitions. We hope our colleagues in the packaging industry of Shanghai will gain something and wish they would make greater achievements in the year to come and work together to build China into a packaging power in the true sense.

近两年，快速变化的国际、国内市场环境，给包装印刷企业发展带来了巨大的挑战，在此局面下，实现机械设备的自动化、智能化生产已成为印刷包装企业突破桎梏、转型升级、发展壮大的必由之路。我们很惊喜的看到，从2001年创办的中国国际瓦楞展一直以来与行业同进退，共发展，为国内包装企业提供了一个联接国际，联接未来的窗口。上海市包装技术协会一直关注励展博览集团旗下与包装产业相关的展会，希望上海包装行业同仁在展会上都能有所收获，更祝愿大家在新的一年里再创佳绩，为把中国打造成真正意义上的包装强国共同努力！

SinoCorrugated is a large exhibition with a lot of high-tech equipment and is very influential in our province. We are much impressed by SinoCorrugated, with its comprehensive content and many new technologies. Our province has a strong corrugated manufacturing industry, and it involves all links of carton manufacturing. SinoCorrugated covers every aspect of the industry and is recognized by members of our association. The carton packaging industry is depressed on the whole this year. We hope the exhibition will help enterprises get out of the trouble. From April 8 to 11, we will visit the five co-located exhibitions as a group.

We've been paying attention to SinoCorrugated since it was first held in 2001. SinoCorrugated, organized by Reed Exhibitions, is a very successful and large exhibition in China and in the packaging industry. The development of Reed Exhibitions and the packaging industry is inseparably interconnected. And Reed Exhibitions is indispensable to the development of many enterprises in the packaging industry. SinoCorrugated covers the whole industry chain. It has not only introduced, connected and integrated industry elements but also offered a platform for people networking. Moreover, the exhibition has introduced overseas advanced equipment and ideas to China and reflected domestic demands to the world. This year our association will organize enterprises to visit the exhibition to meet with old friends and learn more about new trends and new technologies. All main enterprises in the packaging industry of Hubei will participate this year.

从2001年第一届中国国际瓦楞展开始就一直关注这个展会。励展主办的瓦楞展，在整个国内，在包装行业都是很成功的展览，也是规模很大的展览。励展与包装行业的发展相辅相成。包装业很多企业的发展都离不开励展的功劳。瓦楞展是一个全产业链式的展览，不仅对行业要素进行了介绍，串联和整合，同时也是人脉的整合。并且，展览会将国外先进设备、理念带到国内，同时也将国内的需求通过展会反馈到全球。今年协会将组织企业一同前往，去展览会上见见老朋友，也多了解新的趋势，新的技术。今年湖北包装业主力企业均会参加。

The Henan Packaging Technology Association and Reed Exhibitions have a long-term strategic cooperative relationship. In the last six to seven years, we have given full support to SinoCorrugated. We have developed in-depth cooperation and shared resources with Reed Exhibitions. Shanghai is an international metropolis and Zhengzhou is a midwestern city. Such cooperation can help facilitate the development of the industry in Zhengzhou. China's economy is currently undergoing transformation, and investment is favorable work driving the economy. The central-west region has great potential for development, and our enterprises are faced with many development opportunities. Since 2018, China's packaging and printing industry has entered into the downturn period, and packaging enterprises across the country have encountered many difficulties and predicaments. Enterprises in Henan are no exception. We hope that the exhibition organized by Reed Exhibitions will provide ways and train of thought for our enterprises to solve the current predicaments they face. We also wish the five co-located exhibitions held from April 8 to 11 a complete success.

I have been paying attention to SinoCorrugated for more than a decade. It can be said that I've witnessed the development history of SinoCorrugated. SinoCorrugated organized by Reed Exhibitions is of an unprecedented scale and has achieved expected effect, the best among the exhibitions of its kind. SinoCorrugated has developed from a specialized exhibition to a comprehensive one. Visitors can learn everything about packaging and printing at the exhibition. Since 2017, our association has vigorously organized packaging and printing enterprises in the three provinces in Northeast China to visit the exhibition in Shanghai every year. This year we will still strongly support the exhibition.

我已经关注中国国际瓦楞展十几年了，可以说是见证了整个瓦楞展的发展历程。励展主办的中国国际瓦楞展，规模是空前的，效果也达到了大家的预期，是同类展会中效果非常好的。现在瓦楞展由专业型展会发展为综合性展会，会员去一次就能把和包装印刷相关的东西都接触到，效果很好。协会自2017年以来，每年都大力度组织东北三省包装印刷企业前往上海观展，今年依旧会大力支持。

Reed Exhibitions' SinoCorrugated is one of a kind. It is impeccable in every aspect from scale to service to organizing ability. For many years straight, we have organized more than 50 enterprises to visit the exhibition every year. Last year, we organized more than 100 enterprises to visit the exhibition. The brand of SinoCorrugated enjoys popular support in Hunan. The most common comment about the exhibition from our member enterprises is that it is a very professional and international exhibition. This year, five exhibitions, namely, SinoCorrugated, SinoFoldingCarton, PACKCON, SinoFlexpack and SinoPaper, will be held in the same location during the same period. It's very innovative and has threaded the whole industry chain. Some packaging enterprises in Hunan Province will even participate in the exhibition as exhibitors.

励展博览集团旗下的中国国际瓦楞展是具有高度的参观价值的。无论从展会的规模、展会的服务还是展会的组织能力，都无可挑剔，非常到位。我们连续多年每年都组织50家以上的企业前去参观展会，去年更是多达100余家企业随团参观。中国国际瓦楞展的品牌，在湖南地区已经深入人心。会员企业对展会普遍的评价是：专业性强，国际化程度高。明年瓦楞、彩盒、容器、软包装、纸张五个展会，同期同地举办，十分的创新，贯穿了行业的整个产业链。湖南省一些包装制品企业甚至会以展商的身份前来参展。

It can be said that through cooperation and enterprise organization activities in all those years, we have known Reed Exhibitions better and have witnessed the improvement of the exhibition in scale, quality and service. As the Shaanxi Packaging Technology Association, we will fully cooperate and actively organize relevant enterprises to visit, learn and communicate at the exhibition. Most enterprises visit the exhibition to shop around and learn about the performance of equipment in a more direct way by viewing the operation of equipment on the site. Second, they want to save time cost. At the exhibition, they don't need to travel around to see excellent equipment and learn about the latest trends in the industry. Of course, the exhibition is a very important communication platform, where upstream and downstream customers, old and new friends, suppliers and service providers can gather together. We are looking forward to meeting with you in Shanghai in April.

可以说通过这些年的合作与企业组织活动，协会对励展博览集团已经有了比较深的了解。这些年来可以说是见证了展会规模、质量、服务等方面稳步的提升。作为陕西包协，我们也会全力配合，积极组织相关企业去参观，学习，交流。大部分企业来到展会现场，也是为了货比三家，通过现场设备的运转更加直观的了解这些设备的性能。其次，节约企业时间成本，不用每家每户的跑，直接在现场看到非常好的设备，了解到行业新动态。当然，展会也是一个很重要的交流平台，上下游的客户，新老朋友，供应商服务商，都可以借此相聚一堂。期待与大家4月相聚上海。

Since the 2nd SinoCorrugated, I've visited it almost every year. Organized by Reed Exhibitions, SinoCorrugated has taken qualitative leap, no matter in scale or in international outlook. In the past, it attached more importance to the domestic market. Now it is a global, professional exhibition, with a strong global market. I have great confidence in the exhibitions organized by Reed Exhibitions and I'm very optimistic about the prospect of SinoCorrugated. Through the exhibition, we can contact advanced equipment from European and American countries, which will improve automation of the industry. A good exhibition platform can lead the industry and enable the industry to see the most cutting-edge things in the industry.

从第二届瓦楞展开始，我基本上每届都去，励展主办的瓦楞展从创办到现在已经有了质的飞跃。不论是从规模上还是从国际化程度上。以前比较注重国内，现在是全球性的，专业性的展览，形成了遍布全球的强大市场。我对励展博览集团的展览很有信心，非常看好瓦楞展的前景。通过展览可以接触到欧美国家的先进设备，行业自动化程度将越来越高。好的展览平台可以引领行业，看到行业前沿的东西。

Since 2016, Guizhou Packaging Federation has organized member units to visit the packaging series exhibitions organized by Reed Exhibitions every year. The exhibitions are of a large scale and cover a wide range of equipment. Visiting member units have spoken highly of the exhibitions. Guizhou's packaging industry is relatively backward compared to other provinces. We hope platforms like Reed Exhibitions will help our enterprises go out and learn from advanced enterprises to improve their strength and competitiveness, thus promoting the development of Guizhou's packaging industry.

贵州省包装联合会自2016年以来，每年都组织会员单位参观励展博览集团旗下的包装系列展会。展会的规模大、范围广、设备全，每次观展会员单位都给予了非常高的评价。贵州的包装行业就全国来讲还是比较落后的，希望能借助励展这样的平台，带我们的企业走出去，向先进的企业学习交流，提高企业的实力和竞争力，推动贵州包装业的发展。

We have always been thinking well of Reed Exhibitions. Our members visit SinoCorrugated, SinoFoldingCarton, etc. every year. There are new equipment, new technologies and new products at the exhibitions every year. Through the exhibitions, enterprises can know more about the future development direction of the industry and learn advanced technologies. Thanks to the industry shift from the eastern coastal areas in the past two years, Jiangxi's carton packaging industry has developed rapidly. We hope our members will gain something at the exhibitions in Shanghai this year, and we wish the exhibitions a complete success.

一直以来，我们对励展博览集团的印象都很不错。会员单位们每年都会去参观中国国际瓦楞展、中国国际彩盒展等展会。每年的展会都有新的设备、新的技术、新产品，可以让企业能更加了解行业未来的发展方向，学习先进的技术。江西省近两年得益于承接东部沿海地区产业转移，纸箱包装行业发展迅速。希望今年上海的展会现场，大家都能有所收获，也预祝展会圆满成功。

Reed Exhibitions is a world-renowned convention and exhibition company, and many of its exhibitions enjoy a good reputation worldwide, especially its packaging series exhibitions such as SinoCorrugated and SinoFoldingCarton. We organize many member units to visit the exhibitions every year and have received positive feedback. In 2019 Reed Exhibitions has launched an exhibition about flexible packaging, in which we are very interested. A good exhibition platform can lead the industry and enable the industry see the most complete and latest things. This April, we will organize our member units to the exhibitions as always. We wish SinoCorrugated 2019, SinoFoldingCarton 2019, etc. a complete success. We hope it's a worthwhile trip to us all.

励展博览集团是全球非常知名的展会会展公司，旗下的很多展会在全球享誉盛名。尤其是包装系列的展会，如：中国国际瓦楞展、中国国际彩盒展等，协会每年都会大规模组织会员单位集体参观，反响积极。2019年，励展博览集团新开辟了软包装的板块，我们非常感兴趣。好的展览平台能够引领行业，看到行业既全又新的东西。今年4月，我们将一如既往的组织会员单位去现场，预祝2019中国国际瓦楞展、中国国际彩盒展等展会圆满成功，让所有包装人不虚此行。

The Wuxi Packaging Technology Association and Reed Exhibitions go back a long way. We organize our members to participate in SinoCorrugated and SinoFoldingCarton every year. The two exhibitions are very successful and large exhibitions in the Chinese paper packaging industry. The arrangement of exhibitors and audiences by the exhibitions is orderly and the onsite services are in place. There are a great number of carton, color printing and plastic flexible packaging enterprises and corresponding mechanical equipment enterprises in Wuxi. The five co-located exhibitions to be held this year, namely, SinoCorrugated, SinoFoldingCarton, PACKCON, SinoPaper and SinoFlexpack, is an exhibition platform covering the whole industry chain of the packaging and printing industry, and will not only introduce and display, connect and integrate industry elements but also offer a platform for people networking. In particular, we are very interested in the new exhibition SinoFlexpack. We hope to see new equipment, design, materials and products at SinoFlexpack from which our enterprises will learn more about the future development direction of the industry.

无锡市包装技术协会与励展博览集团结缘已久。每年的中国国际瓦楞展和中国国际彩盒展我们都会组织参加。这两个展会可以说是国内纸包装行业很成功、规模很大的展览。展会对展商和观众的组织工作非常有序，现场服务也很到位。无锡地区拥有数量众多的纸箱、彩印和塑料软包展企业及对应的机械设备企业。今年的瓦楞、彩盒、容器、纸张、软包等五个展会同期，是包装印刷行业一个全产业链式的展览平台，不仅针对各个行业的要素进行了介绍展示，串联整合，同时也是人脉的整合。尤其，我们对新推出的软包装展会非常感兴趣。希望能在展会上看到软包装行业新的设备、设计、材料和产品，可以让企业更加了解行业未来的发展方向。

SinoCorrugated organized by Reed Exhibitions is an excellent trade communication platform covering the whole industry chain. April is an off season for production and has good weather. Many enterprises in Jiangsu Province are expected to visit the exhibition. They are eager to see some intelligent, Industry 4.0 equipment and technologies. I've heard that there will be Dream Factory 2.0 on the exhibition site, which fits well with enterprises' current problems and needs. That's great. I believe that like me, many enterprises are also interested in the new exhibit. See you at SinoCorrugated 2019 in Shanghai.

励展博览集团主办的中国国际瓦楞展是一个很好的全产业链的商贸交流平台。四月份是生产淡季，天气也比较好，预计会有很多省内企业前往。大家迫切的想看到一些智能化的，工业4.0的设备和技术，听说今年展会现场开辟了新的梦工厂2.0专区，正好切合企业当前的问题和需求，很不错。我相信很多企业都和我一样，对这个新展区感兴趣，我们2019上海展会见。

Albany brand was founded in 1895 and has more than 120 years old history. As the biggest paper felt supplier around the world that our corrugator belt has more than 70% market share in North American area stilly. Albany belt is the most reliable one which include stable, long lifetime and anti-starch functions. Duraguard series is chemical coating in both sides that the anti-starch and resist abrasion functions can help to save customer costs and extra labor.

The hooks connection of our EZ lagging drum belt changed traditional installation ways. The silicone coating has high frictions with long lifetime. It is easy for installing or removing.

奥伯尼品牌创建于1895年, 已经有超过120年的历史。作为世界上最大的造纸毛毯供应商, 我们的瓦楞纸板传送带在美国有超过70%的市场份额。其稳定, 寿命长以及不粘浆糊的特点是最值得信赖的传送带之一。

DURAGUARD系列产品是边部化学涂层的加强边传送带, 具有不粘浆糊以及耐磨作用, 节省了客户的运行成本以及额外劳动力。

EZ LAGGING防滑套产品颠覆了传统的驱动轮包胶方法, 采用钢扣锁紧式安装方法, 其硅胶涂层摩擦力很强而且寿命更长久, 也容易安装或拆卸。

Cangzhou First Lubricant Co., Ltd. located in Cangzhou, Hebei Province, is a high-tech enterprise that specialises in research and development (R & D) of all kinds of lubricant productions. With strong R & D capabilities, the company is currently one of the top manufacturers of high-temperature grease and is highly acclaimed in the industry for its corporate reputation and economical benefits. The unique high-temperature grease produced by the company, which a considerable portion was used on site by clients, has now replaced the original use of imported high-temperature grease. This allows clients to save on foreign exchange, shorten procurement time and greatly reduce production costs, manpower, material and financial resources. In particular, the company's technical personnel has adjusted the product technical specifications according to the clients' equipment usage. This is highly praised by clients as it prolongs the equipment lifespan and reduce the labor intensity of front-line workers. In face of similar foreign products entering the China market, the company takes a proactive approach to update its production equipment and technology, increase investments in technology development, and constantly develop new products to provide client centric solutions for various lubrication issues.

Our company focuses on mainly producing -70°C to 1,500°C special high-temperature & low-temperature grease, of which (R-320W, R-320C) has been recognized by majority of the users in the packaging industry. The product will be made widely available to more clients.

Chengdu Chuangxin Packaging Technology Co., Ltd. (Chengdu Chuangxin Corrugated Technology Co., Ltd.) was founded in 2001, which specialized in the manufacture & development of corrugated paper products machinery and provide technical reform, service and consultation for corrugated cardboard production enterprises. The "Automatic Glue kitchen System" which independently researched by us filled domestic and overseas vacancy in the field of corrugated paper adhesion control. And we have become the second manufacturer which can achieve automatic control of making glue. Through the technology, it can completely avoid the inaccurate formula, unbalance carrier shearing, instable quality and the big quantity of glue which are caused by manual glue making, to achieve canceling the use of additives, improve the production line's speed and decrease the quantity of glue. In order to meet paper industries' environmental protection requirements, we successfully developed domestic leading International Ink Wastewater Treatment System, which makes the wastewater treatment requirements of our clients completely meet the requirements of national standard. With the decrease of domestic packing industries' labor force and the increase of human cost, our company successfully developed Intelligent Stacking System that is suitable for cardboard and carton box production enterprises through our research and development's 3 years continuous grope and practice. It saves a lot of labor, reduces the labor intensity and is easy to build standardization process by combining the world's most advanced equipment parts and intelligent automation control.

成都创芯包装技术有限公司(原成都创新瓦楞纸品技术有限公司)成立于2001年,专业从事瓦楞纸品机械的制造及开发,并为各生产企业提供瓦楞纸板生产线的技术改造、服务、咨询。公司独立研发的制浆糊系统填补了国内在瓦楞纸粘合控制领域的空白,成为全世界第二个能实现制胶自动控制的厂家。通过此项技术能彻底改变人工制胶导致配方不准确,载体剪切不均,品质不稳定,上胶量大的问题。从而达到提高车速,减少用胶的效果。为适应纸包装行业环保需求,公司成功研制出国内领先的一体化油墨废水处理系统,使客户的污水处理要求完全满足国家标准要求;而随着国内包装制造行业的劳动力越来越少,人力成本越来越高的难题,我公司研发部门历经3年不断的摸索实践,成功开发出适合纸板、纸箱生产企业应用的智能码垛系统,结合世界最先进的设备部件,通过自动化智能控制,在成品堆码方面节省大量劳动力,降低工人劳动强度,容易构建标准化作业流程。公司秉承“创新理念、追求卓越、永续经营”的经营理念;并以“精工制造”,

Specially designed for making printing plates to print corrugated cartons by computer. This machine has functions of computer drawing, typesetting, and chromatography (color registering). The table top is slanted for better observed surface (straight looking view angle). Two aluminium grooves hold printing plate at right position to assure of accurate color registering.

AUTOMATIC PRINTING PLATE MASHING MACHINE:

MODEL: CFW-5808

Printing plate cleaning is not clean, printing can easily cause ink transfer, color is not shiny, automatic induction cleaning machine can solve the problem such as cleaning point yin plug, plate paper damage, greatly improve work efficiency, achieve environmental protection and efficiency.

Bonding System is the newest technology for joining edging strips and mounting films together. This bonding process is characterized by the quality, strength and accuracy. The typical manpower requirements and single/double sided tapes for edging strips plate carriers are completely eliminated. This technology is particularly suitable for improving flexographic plates mounting processes.

压板系统代表了压板的最新技术，这种粘接工艺的特点是质量高，力度强和精度准。不再依赖传统的人力要求，单面/双面胶带也被彻底取代，该技术特别适用于改进柔版印版的安装工艺。

The machine adopts the unique pressure spring type front gauge design to effectively reduce the mechanical failure rate; Cooperate with intelligent control to ensure accurate placement.

The machine adopts frequency control, PLC central control, modulus conversion, operation control accuracy.

The bottom paper adopts double servo control to realize the timeliness and accuracy of the bottom paper to the front gauge and ensure the accuracy of the machine under the condition of machine adjustment.

The rubber roller adopts medium and high design, matching with knurling roller, which greatly improves the uniformity of rubber coating, increases the lamination strength and reduces the production cost of customers.

After the balance treatment and testing of the rigid roller, with the tight assembly process, the stability of the machine is effectively improved. In addition, the main drive is driven by timing belt, and the bottom paper is directly aspirated and fed, which effectively improves the operation accuracy and speed of the machine.

Companies' Products and Services

参展商产品与服务简介

Using liquid level control system, automatic cycle gluing, greatly reducing labor intensity.

Self-developed powerful feida paper feeding device with pre-code paper, reduce downtime, improve work efficiency.

All the materials used in this machine are inspected according to ISO9001 standard. Key parts such as bearings are imported parts. Suitable for 150-450GSM surface paper and A, B, C, D, E, F wave and three and five layers of cardboard (maximum thickness no more than 8 mm) fit.

本机采用独特的压簧式前规设计有效降低了机械故障率; 配合智能控制确保贴和定位准确。

本机采用变频调速, PLC集中控制, 模数转换, 运行控制准确。

底纸采用双伺服控制, 实现底纸到前规的及时性和准确性, 保证机器调整运转条件下机器的精度。

涂胶辊采用中高设计, 配合滚花均较辊, 大大提高了涂胶的均匀性, 提高了覆合强度, 降低了客户生产成本。

刚辊经过平衡处理和测试, 配合紧装配工艺有效的提高了机械的稳定性, 加之主要传动采用时规皮带传动, 底纸部直接吸风送纸, 有效提高了机械的运转精度和速度。

采用液面控制系统, 自动循环上胶, 大大减少了劳动强度。

自主研制强力飞达给纸配以预码纸装置, 减少停机时间, 提高工作效率。

本机采用材料全部按ISO9001标准检验, 质高货实, 耐用性强。关键部位的零件如轴承均采用进口件。适合150-450GSM面纸与A、B、C、D、E、F浪及三层和五层纸板(最高厚度≤8毫米)的贴合。

High degree of automation: the whole machine PLC computer control touch screen operation is simple, intuitive, photoelectric monitoring, the degree of intelligence of private clothing is high, negative pressure suction device touch line dynamic pressure using frequency conversion control technology and PLC to achieve simple communication and operation. The processing touch line quality is good: the traditional convex and concave vertical impact line is adopted, which inherits the advantages of the traditional single machine line impact molding quality, high folding times at crease place, narrow impact line width and flexible and adjustable depth. High accuracy of line impact positioning: because of the initial positioning of high precision photoelectric sensor, combined with 0.001 precision encoder, servo motor is used in the field of CNC machine tools to detect the accurate transmission position of servo motor to ensure the accuracy of cardboard line impact position. A lot of labor is saved: because of the intelligence and high integration of the whole machine, the shift output is 300% to 400% of the traditional single machine. Only 2 or 3 people are needed, which is 30% of the employment of other functional equipment, greatly reducing wage expenditure and labour pressure.

自动化程度高: 整机PLC电脑控制触摸屏操作简便, 直观, 光电全程监测, 私服智能化程度高, 负压吸风装置碰线动压采用变频控制技术与PLC实现通讯操作简便。加工碰线质量好: 采用传统的凸凹垂直碰线, 继承了传统单机碰线成型质量好, 折痕处耐折次数高, 碰线宽窄及深度灵活可调的优点。碰线定位精度高: 由于高精度光电传感器的初始定位, 结合常用于数控机床领域了附带0.001精度级编码器, 伺服电机的精确传送位置检测, 确保纸板碰线位置准确无误。大量节约人工: 由于整机智能化, 集成化高, 班产量是传统单机的300%至400%。仅需人工2~3人, 是其他由此功能设备用工的30%, 大量降低工资支出及劳资压力。

Turbo dust removal windmill.

Suction dust removal knife with electrostatic brush.

Printing type, machine wall open and close type seat, suction air transfer away board

Synchronous lifting device for printing roller and transfer wheel.

Aluminum alloy surface ceramic processing transfer wheel, the rubber wheel has a longer service life, long-term maintenance of cardboard transmission accuracy.

Turbine type windmill and diversion device.

Central dust collecting duct.

Closed blade system. Super wear-resistant plastic scraping knife.

Infrared drying adjustable temperature control system.

The servo motor independently drives the automatic following speed, which isolates the impact of die cutting vibration on printing.

主传动马达采用变频控制机器运转速度。

免键式轴环固定主传动齿轮与传动轴。

吸风箱集中润滑给油装置, 避免润滑保养遗漏注油。

黄油分配器单孔出口确保黄油注入到轴承。

各单元齿轮箱润滑油以泵喷射循环式润滑, 并有专用平油器平衡各机组油箱油位。

防尘式电器控制箱。

采用前缘送纸机构(四轴)。

涡轮式除尘风车。

吸风除尘风刀加静电毛刷方式。

上印式、机壁开合式机座、吸风传送走纸板

印压辊、传送轮同步升降装置。

铝合金表面陶瓷处理传送轮, 较胶轮有更长使用寿命, 长期维持纸板传送精准度。

涡轮式风车及导流装置。

中央集尘管道。

密闭式刮刀系统。超耐磨塑料材质刮墨刀。

红外线干燥可温控系统。

伺服马达独立驱动自动跟速, 隔离了模切震动对印刷的影响。

参展商产品与服务简介

This machine is a new type developed on the basis of high speed nailing machine (450 nailing per minute). Compared with general high speed nailing machine, this machine has the characteristics of simple structure, easy maintenance and strong impact. The head of the nail is made of high quality alloy steel and powder metallurgy materials, with low failure rate and convenient maintenance. The improved semi-automatic high speed nailing machine adopts automatic positioning and feeding mode, which can realize zero training of operators. Using this machine to produce the number of stitches, the stitching distance is completely completed automatically by system planning.

本机是在高速钉机(450钉/分钟)的基础上发展出来的新机型。与一般高速钉机比较,本机具有结构简单,维护方便,冲击力强的特点。钉头部件的材料采用优质合金钢及粉末冶金材料,故障率极低,保养维护非常方便。经改良后的半自动高速钉机采用了自动定位及自动进给方式,完全实现了操作工的零培训。使用本机生产钉数,钉距完全靠系统规划自动完成。

参展商产品与服务简介

The machine utilizes the servo-driven paper feeding and inserting and the adsorption front-edge paper feeding structure with PLC control and man-machine interface. It is easy to operate and has smooth operation; with the low energy consumption and high production efficiency, the machine is suitable for the inner partitioning package of food, beverage, glass, wine, ceramics, fruits, pharmaceutical and electronic product industries. It is the first choice for the inner partitioner production machines in the various paper product industry.

我公司专业生产自动插格机,该机是我公司吸收国内外之设备的优点,通过改进而开发出来的一种插纸隔生产设备。插纸隔机理念设计超前,采用国际顶尖自动化技术,属国内外首次生产,机型造型美观,结构简单紧凑。采用伺服驱动送纸插纸,吸附前缘送纸结构,PLC控制,人机界面。

该机操作方便,调机简单,运行平稳能耗低,生产效率高。适用于食品、饮料、玻璃、酒类、陶瓷、水果、医药和电子产品等纸隔纸箱包装,是各纸品行业插纸隔首选设备。

参展商产品与服务简介

GAZZELLA ATLANTIQUE (Coral group), based in Avrillé, France offers a full lineup of High-speed, Robust, Dynamic - Stitcher/Gluer(Hot & Cold)/Tapers to meet your ever growing equipment needs.

GAZZELLA ATLANTIQUE is dedicated to designing stitching, gluing and taping lines for the heaviest of triple wall jumbo box applications. We offer the full range of automated feeding and stacking options to meet your ever-growing efficiency demands.

Stitching Innovation: A complete rethink of the standard Stitcher-Folder-Gluer. Our newly designed line now allows for automatic adjustment of the traditional fixed gap between boxes! This lost dead space between boxes can now be shrunk to add an additional 30% of increased output. The new double in-line stitching head makes our world renown static folding reach speeds of 90m/min at 1800 stitches/min. The fully automatic order set-up allows for production speeds of up to 8000 stitched boxes/hour (12,000 glued) -- We have created the capabilities with the rest remaining up to you.

Produced by Euramerican design philosophy, HS features movable units, vacuum sheet transfer; Optional drying devices of hot air, IR or UV facilitate full screen coated paper printing. Touch screen PLC is equipped for frequent order store, remote maintenance and fast trouble shooting; Ink on anilox roll and in doctor blade chamber can be reclaimed and washed in a short time, saving water resources; Automatic lubrication system keeps lubricant of all units at the same level; Independent motor drive compensates speed of anvil drum when printing of normal cartons is performed.

HS机型主要功能:

欧美设计理念, 各单元移动机组, 全程真空吸附印刷, 可配置热风、红外线、紫外线 (UV) 独立烘干装置及刮刀, 实现网点满版涂布印刷; 独立电脑触摸屏PLC控制; 可存储常用订单; 整机快速换版功能; 快速洗墨及节墨功能; 机油自动平衡装置; 模切变频补偿装置; 可选配远程维护, 快速排除设备故障。

Guangdong zerone Intelligent Technology Co., Ltd. (hereinafter referred to as zerone) was established in 2006, is a national high-tech enterprise integrating R & D, manufacturing, sales and service. Over the years, we have closely followed the development pulse of the corrugated industry, adhered to the concept of "achieving user value", focused on the corrugated industry, focusing on cardboard and carton, and devoted ourselves to the research and development of technological innovative products for a long time. We have many independent invention patents and soft writings. So far, we have developed into intelligent tiles, group ERP/MES software and integration. Intelligent Logistics is a scientific and technological group which integrates three main business lines and develops intelligentized equipment and software services concurrently.

参展商产品与服务简介

zerone takes "promoting the progress of corrugated industry" as its mission, takes "building an intelligent chemical plant" as its strategic objective, and provides two core services for the corrugated industry, i.e. plant planning and plant equipment. Through independently developed group ERP/MES software, production management system, whole line control system, whole line temperature control system, Suiba 300 intelligent tile line, base paper logistics, cardboard logistics and other leading scientific and technological products, to meet the corrugated industry users' needs in office, billing, production, transportation and other aspects. After many years of development, zerone has taken the lead in realizing 250 m/min non-decelerating rate change orders in tile line field. It has profoundly influenced and changed the production mode and efficiency of a large number of users, and opened up a broader development prospect for the corrugated industry.

In the future, zerone will cultivate corrugated wisdom and build a career. The long-term development plan is to deepen the vision of full industrialization, insist on independent innovation and establish national industrial brand. And relying on the perfect independent R & D system and R & D personnel accounting for 30% of the total number, Siemens Germany has reached strategic partners to establish the industry's first "Industrial 4.0 Intelligent Factory R & D Center" for in-depth R & D. Jointly build corrugated industry intelligent chemical plant.

广东振远智能科技有限公司(以下简称:振远)成立于2006年,是一家以研发、制造、销售、服务为一体的国家高新技术企业。多年来紧贴瓦楞行业发展脉搏,坚持“成就用户价值”为发展理念,聚焦瓦楞行业,围绕纸板、纸箱两大板块,长期致力于科技创新产品的研发,拥有多项发明专利及软著,至今已发展成为融智能瓦线、集团ERP/MES软件、整厂智能物流三大主营业务为一体、智能化设备与软件服务并行发展的科技集团。

振远以“推动瓦楞工业进步”为使命,把“打造智能化工厂”作为战略目标,为瓦楞行业提供整厂规划及整厂设备两项核心服务。通过自主研发的集团ERP/MES软件、生产管理系统、整线控制系统、整线温控系统、速霸300智能瓦线、原纸物流、纸板物流等领先的科技产品,满足瓦楞行业用户办公、排单、生产、整厂运输等方面的需求。振远经过多年的发展,在瓦线领域率先实现250米/分不降速换单。深刻影响和改变了大量用户的生产方式和效率,并为瓦楞行业开创了更加广阔的发展前景。

未来,振远将深耕瓦楞智造事业。以全产业化视野深入拓展,坚持自主创新,树立民族工业品牌为长期发展规划。并且依托完善的自主研发体系及占总人数30%的研发人员,同时与德国西门子达成战略合作伙伴,建立业内第一个“工业4.0智能工厂研发中心”进行深度研发。共同打造瓦楞行业智能化工厂。

Rida Zhongqi software brand, relying on Yuzhongqi carton packaging factory, has focused on ERP (enterprise resource plan) for 10 years and has become an independent, professional software development platform for the carton industry.

In the early years of the carton production, we found too much duplication of work. Order, board purchase, delivery bill, sales reconciliation details repeatedly manually transcribed and calculated... Each item is a waste of manpower, time, and through years of exploration, Reda Zhongqi carton industry management software was introduced to help complete tedious repetitive work. Programming automation, so that you keep up with the progress of work; Visual simplification allows you to see all the information at a glance. Clearly beautify the work flow, provide staff work efficiency, enhance the image of the enterprise while enhancing the core competitiveness of the enterprise. This is exactly what an efficient piece of software is all about, and I hope we can share that experience with you.

瑞达中奇软件品牌, 依托于中奇纸箱包装厂, 10年来专注于ERP (企业资源计划), 已成为一家独立自主, 专业针对纸箱行业的软件开发平台。

早年的纸箱生产过程中, 我们发现了太多重复工作。开单、纸板采购、送货单、销售对账明细反复手工抄写计算... 每一项都是对人力、时间的浪费、通过多年摸索, 瑞达中奇纸箱行业管理软件面世, 用以帮助完成繁琐的重复工作。编程自动化, 让您随时掌握工作进度; 视觉精简化, 让您对所有信息一目了然。清晰美化工作流程、提供员工工作效率, 提升企业形象的同时提升企业核心竞争力。一款高效软件的意义正是如此, 希望我们能将这种体验分享给您。

G Series of Cassette Single Facer

Design speed: 250m/min Working width: 2500mm

1. It is in cassette feature design for market satisfaction to different flute.
2. The flute roller locating under pressure roller helps achieve lower noise and less vibration for more smoothly and stably running, which shall give safer, faster and more convenient flute change.
3. The flute change can be finished within 15 minutes. The electric trolley shall be used for complete cassette roller delivering into the body and then matched with oil hydraulic system for locking. The use of just several button switches can help finish roller change in high efficiency.
4. Negative-pressure design helps flute paper attaching well to the flute roller surface, which can be applied in both inner and outer adsorption for better flute shape.
5. The modified gluing system makes both glue roller and doctor roller cover the whole glue-storage space, matched with the circle tangent speed difference between the two rollers for stable gluing thickness on the surface of glue roller for better flute sheet.
6. It is designed with PLC program control and man-machine interface for easy and safe operations.

This axial thrust mechanical chucks with keys provide the best quality to price ratio to clamp reels for cardboard and other materials.

The chuck feature a spring system which, when introduced inside the reel core and therefore a force is applied, expand a series of segmented keys to guarantee substantial grip on the reel core.

Xufeng series XF-250A, XF-250 brake is popular because of its conservation, durability, convenient assembly and maintenance. The imported brake pads inside bring hard-wearing quality with stable air pressure and large torque. 3-6 sets of pneumatic brake components provide reliable activity.

Xufeng new series of conveyor chain is compact in nice appearance. It has the advantages of the bearing force.

This series runs smoothly and quietly while convenient in installation.

**THE FASTEST, TOUGHEST
ANVIL COVER IN THE WORLD.
全行业质地更坚硬、
使模切速度更快的滚筒胶垫**

The Timesaver lives up to its name, cutting rotation times from 30 minutes to three. Because it's the only anvil cover that's twice as wide as the industry average, it can be rotated faster and lasts longer. The Timesaver also features a unique construction of solid steel backing followed by a proprietary process that welds the steel lock bar and steel angle for a precise fit every time – a vital dependability difference that means seamless installation and a perfect cutting surface.

真正名副其实, TIMESAVER® 能将胶垫的换位时间由30分钟缩短到3分钟。它比普通胶垫宽两倍, 因此其换位速度更快, 使用寿命也更持久。另外, 由C.U.E. 专利工艺精密焊接的实心钢质锁紧杆与钢角构成了其独特的全钢支撑结构, 其背部焊接成一体, 使安装天衣无缝, 模切表面臻乎完美!

参展商产品与服务简介

Our advanced vision and reliable services will enable Yong Yuan to produce new development reach new heights with our customers together!

The exhibition mainly displays synchronous servo motors and three-phase induction Motors. Their characteristics are "synchronous servo motors have the characteristics of lightweight, speed positioning, and high efficiency and energy conservation". "Three-phase induction motors have energy saving and carbon reduction, in line with national GB2, GB3, IE2, IE3 and other characteristics".

永元电机自1988年创立以来,即秉持专业服务、永续经营之理念,以不断进步的坚强实力,配合客户需求与社会脉动,精益求精。

目前产品线包括各项高效马达、减速机、绿电发电应用等、奠定集团发展主力。

未来,将以高瞻视野、信赖服务、与客户并肩开创新局、再创高峰!

这次展会主要展示同步伺服电机及三相感应电动机,他们特性分别为“同步伺服马达具有轻量化、速度定位、高效节能的特性”“三相感应电机具有节能减碳、符合国家GB2、GB3及IE2、IE3等特性”。

1. Energy-saving intelligent temperature control system mainly saves production costs for customers, improves product quality steadily, and reduces product wastage by self-energy control of tile temperature of raw pipeline connection. The temperature control and water conveyance monitoring and early warning of various equipments on tile line are carried out, and the steam data are counted for cost analysis. The main functions include constant temperature control, secondary utilization of flash steam recovery, intelligent water conveyance, production line preheating protection, early warning system, flow statistics, hot plate middle preheating and automatic wrapping angle, etc.

2. Perforated ultra-thin hot plate retrofitting (including steam injection function) saves a lot of steam cost, heating and cooling speed faster to adapt to scattered single production.

3. Full set of energy-saving and consumption-reducing production lines, improve production efficiency programs tailor-made.

1、节能型智能温控系统主要为客户节约生产成本, 稳定提高产品品质, 主管连线自能控制瓦线温度减少产品损耗。对瓦线各设备控温、输水监控预警, 各项蒸汽数据统计以便成本分析。主要功能包括恒温控制、闪蒸汽回收二次利用、智能输水、生产线预热保护、预警系统、流量统计、热板中层预热和自动包角等功能。

2、穿孔超薄型热板改造(含喷蒸汽功能), 节约大量蒸汽成本升温降温速度更快适应零散单生产。

3、生产线全套节能降耗、提高生产效率方案量身定制。

参展商产品与服务简介

LC-505 automatic strapping machine is a model developed by our company together with Tai wan's top baler manufacturers and designed according to market demand.

This machine adopts human-computer interaction system, PLC control, and fault will be displayed on the human-computer interaction system, compact structure, simple adjustment, convenient operation and stable performance. The parts of the machine head are made of chrome-molybdenum alloy steel, which is more wear-resistant by special processes.

Through the centralized oil supply system, the lubrication of the active parts is ensured, and the service life of the parts is greatly improved.

Equipped with two sets of random paper detection photoelectric, and PE end detection with automatic output system (optional)

The feeding and conveying is completed by the power roller and the servo motor pushing mechanism.

LC-505型全自动捆扎机是我公司与台湾顶级打包机制造商共同研发设计, 根据市场要求特制一款机型。本机采用人机、PLC控制、故障显示、结构紧凑、调整简单、操作方便、性能稳定。

部件铬钼合金钢, 经特殊工艺处理, 更持久耐磨; 通过集中供油系统, 保持活动部位润滑充足, 大大提高零部件的使用寿命。

配有2组乱纸检测光电及PE结束带检测, 配自动输出系统(选配); 入料输送由动力滚筒与伺服电机推送机构共同完成, 保证每次送料都精准到位。

绕线臂动作采用与机头母体同轴的凸轮摆臂机构驱动, 动作流畅且保证长期稳定; 整套打结机构由伺服电机驱动, 动作反应迅速, 大大提高了整机工作速度。

In addition to being durable, corrugated boxes need to look good in order to sell their contents. There is a need to raise the level of automation in corrugated board production to meet the customer expectations. Valmet's innovative, moisture measurement-based quality management solution for corrugators includes e.g. cost- and space-efficient multipoint moisture and scanning moisture measurement systems and a camera-based warp measurement for the combined board flatness control. Valmet IQ Moisturizer corrects all kind of warp board by adding fine and controlled water mist in to the liners.

Valmet IQ is used by dozens of corrugators in various parts of Europe. The experience gained has been very positive. Warping after the corrugator has significantly decreased, and sheets run better on the printing machines, enabling higher speeds. Also the speed of the corrugator has been increased up to 20%. There is less waste from the corrugator and converting. All these factors have helped plants lower their production costs and improve productivity.

用于递送货物的纸箱要求持久耐用, 质量控制在瓦楞纸板生产中具有重要的作用。Valmet IQ质量控制系统近期来在瓦楞纸机的翘曲控制上取得了不俗的业绩, 因此维美德专为瓦楞纸机的工艺质量控制开发了一套新的质量控制解决方案。

采用维美德先进的质量控制解决方案, 可以使瓦楞纸板的质量以及瓦楞纸板机的生产性能得到显著改善。从单面机到双面机, 有效的水份控制和温度控制, Valmet IQ质量控制在降低翘曲度并提高胶液的渗透和结合。

Valmet IQ在欧洲各地的瓦楞纸板商得到广泛的应用。在瓦楞纸板显著减少翘曲, 纸张在印刷机上运行性更好, 从而实现更高的速度。此外, 瓦楞纸板的速度也提高了20%。瓦楞纸板和转换产生的废物更少。所有这些因素都有助于工厂降低生产成本并提高生产率

参展商产品与服务简介

For the Blade used in corrugated field, we could provide exported level Tungsten Carbide materials and High Speed Steel W6 (M2 Type with Hardness HRC62-64) for the customers. What is more, in conjunction with our Grinding Wheels (Diamond Grinding Wheel matched with T.C. Blade and CBN Grinding Wheel matched with HSS Blade), the performance of the blade will be better.

Besides the Sitter Blade, we could also provide slotting knives in materials of Cr12MoV, 9SiCr or other steel.

As a manufactory, we also accept to produce Grinding Wheels and Blades under your Drawing or Exact Requirements.

我们是专门提供各种规格的砂轮及刀片的生产厂家。“英隆”可为众多知名瓦楞生产线提供配套的砂轮及刀片，如AGNATI、BHS、FOSBER、协旭、湖北京山、马贵、TCY、开拓、K&H等。

我们可为客户提供硬质合金出口精细料及高速钢W6材质的刀片。而且，我们的刀片及砂轮配套使用，硬质合金刀搭配金刚石砂轮、高速钢刀配套CBN砂轮，效果更佳。

除薄刀外，我们也能生产Cr12MoV、9SiCr及其他钢材的纸箱开槽刀。

作为工厂，我们还可按照客户的图纸或具体要求提供相应的砂轮及刀具！

中文：企业的宗旨：志存高远、品牌炬兴、拼搏务实、诚信炬兴。这些年“炬兴”创造的经典：

2007年基于半自动模切机平台，创新推出“二次定位”结构，使生产效率提升了约10%。

2009年继续推出不停机补纸机构，使整机的效率再次提升约10%。

2010年优化全自动卡纸对裱机结构，使之产品的加工范围更能适应绝大部分用户。

2012年创新研发高速裱纸机，机器时速突破12000张，贴合精度±1mm。

2014年首创推出双平台供纸机构，降低了全自动模切机整机安装的难度，大幅提升了操作者的舒适度。

如今“炬兴创造”仍在继续，敬请持续关注！

Zhejiang Yonghui roller is a company with advanced production equipment and strong technical strength and high-quality professional manufacturer of corrugated roller.

Since its establishment in 2004, has been committed to the design and development of high quality corrugated stick; Has the most advanced science and technology, experienced professional design and independent R & D capability of scientific research strength and perfect after-sales service team; Has the perfect production process, the most advanced automatic numerical control precision corrugated roller grinding machine, using the United States JP8000 supersonic Tungsten carbide corrugated flame spraying equipment, is currently the most advanced supersonic spraying equipment; Make sure that every time the design and production of the customer's needs, to achieve maximum customer value;

Yong Hui corrugated roller, all products are through the most advanced high-precision CNC grinding machine grinding and roundness tolerance for 10 m, using nitrogen hardening And medium frequency induction quenching process, it can be for all types of single machine matching production of corrugated stick.

Main products: Peripheral Heating Corrugated Roller, tungsten carbide wear-resistant hard chromium corrugated, corrugated roller stick, tungsten carbide rod flame spraying equipment, metal roller, High precision pressure stick, glue stick and other products.

The Company was established in beautiful Zhuhai Special Economic Zone in 1992 by reforming and moving the Number 5606 Factory of the former Ministry of Ordnance Industry to Zhuhai. After transformation of the technologies for manufacturing military products, it is engaged in development and production in the machinery automation field. After multiple years of constant efforts, it has been developed from a machinery processing enterprise to become a modern leading enterprise in the paper splicing industry, engaged in development, manufacturing, installation and after service, with more than one hundred employees.

Following the employment philosophy of "human-oriented", the Company arouses the work activity of all employees to the maximum extent, to enhance all employees' sense of being masters and to greatly raise production efficiency. The Company registered the trademark of [HIP] series automatic paper splicing machines and applied for the registration of over one hundred patents in 2005, and obtained multiple European patents issued by the State Intellectual Property Office of the PRC in the same year. The Company passed the certification of ISO9000 quality system in 2007, and the [HIP] series automatic paper splicing machines successfully passed the European CE certification in 2009. wing to its constantly growing business, the Company was moved from Zhuhai to the adjacent </pt95> </pt94> <pt96> <pt97>Sanxiang Town, Zhongshan City in 2009, and invested over 30 million yuan to establish new modern industrial factory buildings occupying over ten mu of land and to purchase various advanced automatic production equipment. The Company is meeting greater opportunities and challenges in the market, customers and products full of enthusiasm and self-confidence. It is willing to create a beautiful future jointly with a vast number of users.

公司于1992年由原兵器工业部第5606厂迁往珠海改制后创建成立于美丽的珠海经济特区。用制造军工产品的技术转型从事机械自动化的研发和生产，经过多年的不懈努力从原来的机械加工企业发展成为集研发、制造、安装及售后服务一体化并拥有一百多名员工的现代化接纸机行业的领军企业。

technology reached the international advanced level, the core technology is the international leading level". The goal of Sinovan is to creating a kind of excellent corrugated-board printer that can take the place of offset printer in the packing cartons field. Obviously, Sinovan has its own advantages for the products, such as the high precision ($\pm 0.25\text{mm}$), the high definition (133Lpi), the high efficiency, the low costs, the adaptability, the stability, etc.

株洲三新包装技术有限公司成立于2000年，是一家专业制造全伺服高精度瓦楞纸板印刷机的高新技术企业。自创立以来，一直以技术创新为立身之本，早在2000年就率先开始了全伺服瓦楞纸板印刷机的研发项目，2002年首台全伺服高网线瓦楞纸板印刷机的问世震惊国内外，并且专注此系列产品的完善与升级至今。通过多年的技术积累，三新拥有53项专利（其中发明专利23项）和4项软件著作权，形成了较完整的自主知识产权体系，研制的第三代全伺服瓦楞纸板印刷机被国家科技部、经信委和机械行业办成果鉴定为“整体技术国际先进水平，核心技术国际领先水平”。

众所周知，所有技术创新的动力都来源于市场需求，此系列产品研发的目标就是：在纸箱包装领域里，打造一款可以替代胶印的高端水墨印刷机，在伺服系统的控制下通过：“送纸—除尘—印刷—红外烘干—上光—紫外烘干—开槽—模切—清废—堆积”一系列的高效率生产结构，并保证了 $\pm 0.25\text{mm}$ 的套准精度，最高量产133Lpi印刷网线的前提下，让瓦楞纸板实现了从运输包装到销售包装的华丽升级。

2014年三新启动了新的战略规划，产品系列更加多元化。“全伺服高精度高清印刷机”、“全伺服高精度高速印刷机”、“全伺服高精度联线印刷机”、“全伺服多物流输出系统”等系列产品的推出，给包装厂商增加了更多、更人性化的选择，为自动、智能纸箱的生产模式添砖加瓦。

Xiehelong Packaging Machinery Factory is a technically powerful professional manufacturer of corrugated rollers.

The factory introduces NC high precision corrugated roller machining center made by Germany Siemens. With advanced laser-quenching processing technology, the quality of corrugated roller is improved greatly. After "tungsten carbide" "boron carbide" treatment, the production process of corrugated roller becomes better. The corrugated rollers are featured with longer service life and the work efficiency is effectively increased. After ten years constant effort, Xiehelong has been recognized by all customers. The products enjoy good reputation in the market. In order to provide better services to the customers and feedback to society, in October 2006 to start developing and manufacturing paperboard production lines, so that we can provide more complete lines of products and services to the customers, improving ourselves to face new challenges. "Good faith forever, loyal services, quality in priority, keep improving, people oriented, constantly developing". That is the culture and also the target of Xiehelong.

协合隆包装机械厂是一家拥有强大技术力量的瓦楞辊专业生产厂家。

本厂引进了德国西门子全数控高精度瓦楞辊加工中心, 配合世界先进齿型设计概念, 使瓦楞辊质量上升更高的档次。使喷涂碳化钨瓦楞辊的生产工艺更加完善。所生产的瓦楞辊具有耐磨, 延长工作寿命, 有效地提高工作效率。

协合隆经过十年不断的努力, 得到广大顾客的认可, 而且树立良好的口碑。为进一步服务好客户, 回馈社会, 报以勇于开拓的精神, 于2006年10月, 开始开发生产纸板生产线, 使本厂对客户的服务更加完善配套, 同时提升自我, 挑战自我。

“诚信久远, 服务忠诚, 质量至上, 精益求精, 锐意创新, 以人为本, 永不停滞”, 这就是协合隆追求的文化与目标。

Found more than 15 years ago, Guangzhou KingTau Machinery and Electrical Equipment Co., Ltd. firstly appeared in solvent printer. At the present moment it devotes itself to research and develop various kinds of inkjet printers, such as: ceramic inkjet printing, glass inkjet printing, wood flooring inkjet printing, woody slab inkjet printing, metal slab inkjet printing and so on. Then it continuously launches the digital inkjet printing total solutions for both building & packing materials.

uno X50 is the industrial inkjet printer for corrugated board which Guangzhou KingTau Machinery & Equipment Co., Ltd. aims at the increasing demand for flexible production in the corrugated paper market. Based on the trend of high-frequency conversion and customized design, this industrial inkjet printer develops with new technology to meet the needs of small orders.

Guangzhou KingTau Machinery and Electrical Equipment Co., Ltd. continuously provides its high-quality, high-efficiency inkjet printers for the corrugated packaging industry. Meanwhile it will also pass the just-in-time and high-quality after-sales service to the corrugated paper field;

Tangshan Shengjing Printing Machinery Manufacturing Co., Ltd. is a professional manufacturer of flute laminator. Flute laminator products are divided into three series: FMB series five ply flute laminator, Q series automatic flute laminator and B series semi-automatic flute laminator. The company adheres to independent research and development, constant improvement, with customer needs as the guide.

In 2017, the company independently developed a patented product - FMB series automatic five ply flute laminator. This machine opens the precedent of domestic and foreign flute laminator equipment, which turns the idea of one printed face paper with one or two corrugated papers lamination into reality. The machine has the features of reasonable design, simple structure, convenient operation, long life and good performance, which can replace the function of the five-layer corrugating line.

唐山盛景印刷机械制造有限公司是一家专业生产覆面机的制造企业。覆面机产品分为三大系列：FMB系列多层覆面机，Q系列全自动覆面机，B系列半自动覆面机。公司坚持自主研发、不断完善，以客户需求为引领。

公司在2017年自主研发成功的专利产品—FMB系列多层覆面机。本产品开创了国内外覆面机设备的先例，可将一张彩印面纸与一张或两张瓦楞纸一次性裱贴的构想转化成现实。该机器具有设计合理，结构简单，操作方便快捷、寿命长、性能好等特点，可代替五层纸板生产线的功能。

Automatic Foil Stamping & Die-cutting Machine is widely used for the die-cutting, creasing, foil stamping, cold and hot embossing of cigarette box, drug box and label in the packaging and decoration industries. The machine adopt the high technology to realize the fully automatic feeding, diecutting, stamping, delivery, up-press, down-press, leap step, counting, heating, pre-heating, obstacle indicating, checking and measuring. With the feature of easy operation, reliability, high speed, pressure and precision.

Automatic flat-bed die-cutting machine with front edge lead feeding, adopting high intensity gripper bars, with advanced gripping mechanism, thus adapting to different kinds of corrugated board; independent design of front and rear positioning mechanism side positioning device makes the die cutting precision more stable and accurate; The H/M interface displays working speed of the machine, quantity of processed sheets, total running time; monitoring the input and output points of the PLC make operation more convenient. Adopting frequency inverter to control the main motor, achieving stepless speed regulation and stable operation, low noise and energy saving. The machine has a characteristic of high pressure and high registration accuracy. Also sensors and safety devices in whole machine ensure the normal running and personal safety. The machine has passed ISO9001 quality system certification and meets EU CE safety standards.

Automatic folder gluer is mainly used for cartons and boxes manufacturing in the packaging and decoration industry. Whole machine achieves full automation of paper feeding, correcting, pre-folding and gluing, bottom locking, down gluing, final folding, pressing, conveying and collecting.

This machine is safe and stable, intelligent and human friendly, easy to operate, safety protection is well established, and all electrical appliance complies with CE safety standards. There are many innovations overall whole machine.

Window Patching Machine is widely used in the film patching to be package with or without the window of the phone box, wine box, napkin box, cosmetic box, toy box, milk case, card etc. It can be used for the function of the paper gluing, film patching, film cutting of card 200-500g/m2 and Corrugated paper within 7mm thick.

Plastic Handle Machine is newly developed machine, with the independent intellectual property, with advanced technology level, the automation control, operation is convenient and easy, safety and reliable, suitable for the kinds of paper box, plastic handle working, especially for the milk case, drink case, wine case etc.

全自动烫金模切机, 主要用于包装装潢工业中红盒、纸箱及商标等产品的模切、压痕、烫金及冷热压凹凸, 是用户理想的模切烫印设备。本机实现给纸、模切、烫金、收纸、收箔、升压降压主、电化铝步进、跳步、计数、加热、预热、故障显示、故障检测等过程的自动化。具有操作方便, 安全可靠、速度高、压力大、精度高等特点。

Companies' Products and Services

参展商产品与服务简介

全自动平压清废模切机带前缘送纸,本机采用高强度航空铝合金叼纸牙排,配合先进的开牙叼纸机构,能适应各类瓦楞纸的不同需求;本机独立设计的前后定位及侧定位装置使模切精度更加稳定准确;本机应用“人机介面”显示机器的工作速度、加工张数、机器总的运行时间和工作状态;对可编程控制器的输入点、输出点及各种故障状态监控,使排除故障及操作非常方便。采用变频器控制主电机,无级调速,运行平稳,噪音低,省能源。本机压力大,套准精度高,多处设有传感器和安全装置,保证机器正常工作和人身安全。该机通过ISO9001质量体系认证并符合欧盟CE安全标准。

全自动糊箱机该机主要用于包装装潢工业中的纸盒、纸箱制品的糊盒、糊箱作业。本机实现了从给纸、折角上胶、钩底、底贴上胶、本折、压着、输送及横向输送收纸过程的自动化。我们在设计开发中本着稳定、耐用、安全、人性化、操作方便的设计理念遵循欧盟CE安全标准,对机器的整体框架结构及多处主要结构作了重大创新,对安全防护做仔细的改进,因此,机器性能更加稳定、操作更加安全方便。

贴窗机适用于对手机盒、酒盒、礼品盒、餐巾纸盒、化妆品盒、儿童玩具盒、服装盒、奶箱、贺卡等有窗口或无窗口的包装类的纸品进行贴膜加固。适应的卡纸200-500g/m²,适应牛皮纸≤250g/m²,本产品实现了自动在经模切后糊盒/箱前进行纸板上胶、贴膜、膜片开口(选配)、整理的功能。

穿塑料提手机是我公司自主研制开发的一款新产品,具有独立的知识产权,具备先进技术水平,整机自动化控制,机、光、电、气融为一体,操作简单方便,安全可靠,适应各类纸制品箱、盒的塑料提手穿插作业,特别是奶箱、饮料箱、食品、酒盒、玩具盒等的片状产品。

NC-Auto Rotary Die-Cutting machine, PLC precision control of the entire computer system, leading-edge feed system, feeding precision is high, speed and long life round feed, feed 10,000 per hour speed. Phase planetary gear used electric adjustment, turn on and turn down were quick adjustment.

Model Rotary Roller Die-Cutting Machine, Applicable to all kinds of die-cutting and various special-shaped corrugated cardboard packaging. It has high efficiency, energy saving and safety features.

Trash-cleaning machine is high and medium speed circle pressure circle die-cutting machine form a complete set of equipment, it has simple structure, convenient operation, waste effect is good, economic and practical features, in the production to reduce the artificial reduces the labor intensity.

前缘送纸圆压圆模切机, 全电脑PLC精密控制系统, 送纸精度高, 速度快, 实现每小时10000张, 相位采用行星齿轮电动调整, 开机停机均快速调整。

经济型辊筒模切机, 适用于各种瓦楞纸板或异型包装, 效率高, 省电, 安全。

清废机, 与高速圆压圆配套, 结构简单, 操作方便, 清废效果好, 经济实用, 在生产过程中减少人工降低劳动程度, 是纸箱行业理想的清废设备。

Xiehelong Packaging Machinery Factory is a technically powerful professional manufacturer of corrugated rollers.

The factory introduces NC high precision corrugated roller machining center made by Germany Siemens. With advanced laser-quenching processing technology, the quality of corrugated roller is improved greatly. After "tungsten carbide" "boron carbide" treatment, the production process of corrugated roller becomes better. The corrugated rollers are featured with longer service life and the work efficiency is effectively increased.

After ten years constant effort, Xiehelong has been recognized by all customers. The products enjoy good reputation in the market. In order to provide better services to the customers and feedback to society, in October 2006 to start developing and manufacturing paperboard production lines, so that we can provide more complete lines of products and services to the customers, improving ourselves to face new challenges.

"Good faith forever, loyal services, quality in priority, keep improving, people oriented, constantly developing". That is the culture and also the target of Xiehelong.

协合隆包装机械厂是一家拥有强大技术力量的瓦楞辊专业生产厂家。

本厂引进了德国西门子全数控高精度瓦楞辊加工中心，配合世界先进齿型设计概念，使瓦楞辊质量上升更高的档次。使喷涂碳化钨瓦楞辊的生产工艺更加完善。所生产的瓦楞辊具有耐磨，延长工作寿命，有效地提高工作效率。

协合隆经过十年不断的努力，得到广大顾客的认可，而且树立良好的口碑。为进一步服务好客户，回馈社会，报以勇于开拓的精神，于2006年10月，开始开发生产纸板生产线，使本厂对客户的服务更加完善配套，同时提升自我，挑战自我。

“诚信久远，服务忠诚，质量至上，精益求精，锐意创新，以人为本，永不停滞”，这就是协合隆追求的文化与目标。

Established in 2004, Richly Top has since been a leading Hong Kong based CNC equipment company specializing in manufacturing professional automated die-making equipment and machinery.

Hung-Ko Kong and Chang-Ming Wu, the two enthusiastic founders of Richly Top, have amassed over 50 years of experience between them, in the die-making and computer automation industries. These industry leaders integrated their experience and expertise together to form Richly Top with the vision to produce cutting edge auto bending machines for die-makers the world over. Apart from the Richly Top CNC Equipment (Shenzhen) Limited, our office headquarter and factory in Shenzhen, we have recently expanded to establish two machinery production lines and fully covered after-sales service departments in Japan and in Hungary to serve Japan and EU countries.

Richly Top's main scope of business includes the sale of auto-bending machines and software, namely Ultrabender and Future CAM software. We are also a renowned distributor of die-making products and are constantly looking for innovation and opportunities to cooperate with our partner companies to provide customers a wider range of machinery selection within the industry. We export our products and services worldwide.

Through our commitment to research, innovation, quality and customer service, we at Richly Top have developed long-standing relationships and partnership with customers around the world: Asia, Europe, North America, Latin America, Australia, and Africa. Richly Top has gained industry respect and recognition for our continued focus on producing high precision, high-efficiency and high-quality machinery and equipment.

The core advantages:

The price and usage cost of laser cutting machine is very high, the development of new type cnc technology, the mechanical cnc cutting machine is accepted by die making industry. After research and design of several years, the vertical CNC rotary die making machine is invented and has following advantages:

1. Turn on the machine and use immediately. No need to wait, no need machine starting charge. No need first design box then start machine to cut.
2. The using cost is low, speed is fast, it can detect and stop if cutting drill break, automatically follow, it improves automation and reduce human works greatly, the only consumable part is drill. One piece of drill can cut several even more than 10 sets of rotary dies.
3. Low energy consumption, low requirement for voltage and electrical current, 2 phases 220V is ok to power the machine.
4. The upper and lower cutting line have good vertical accuracy, it can hold the knife well, the neighboring knife can allow no welding.
5. Screw holes of all sizes and all shapes can be cut by one time, it solves the problem of inexact screw hole design.
6. In cutting, the board does not smoke, does not burn, no any pollution air, it is first choice of environment protection model.

由于激光机设备成本和运行成本居高不下, 新的数控技术的发展, 机械式数控切割机渐渐被刀模行业所认可, 经过多年潜心研究及设计实践, 立式数控圆模切割机具有以下优点:

- 1) 即开即用, 无开机费用无需等待。更不需要等刀模图都设计好了再开机切割。
- 2) 运行成本低, 速度快, 并有断刀检测停机, 自动跟随功能, 大大提高了自动化减少了人力。唯一的耗材就是铣刀, 一根铣刀可以切几套甚至十几套模具。
- 3) 低耗能, 设备对电压电流要求低, 两相220V普通家用电即可满足设备需求。
- 4) 切割刀缝上下一致, 夹合力好, 做好的刀模可以不焊接。
- 5) 任何大小任何形状螺丝孔一次性完成, 解决了螺丝孔设计不准的问题。
- 6) 不燃烧不冒烟, 无任何污染气体排放, 环保型首选机。

1. The machine is suit able for waste margin. stripping of various kinds of cardboard single (double) corrugated and other kinds of corrugated paper which can strip quickly and easily.

2. Stripping efficiency is improved by 10 times, 30 minutes by hand, 3 minutes with the waste stripper.

3. Greatly shorten the delivery cycle

4. Reduce the space occupied by the semi-finished products.

5. Compared with stripping by hand, it greatly reduces scrap rate.

6. No damage for bonding area while stripping improves the efficiency of the following process gluing

7. CE certificate

8. Lower energy consumption, stronger power.

9. Operator's work is simplified. They will be appreciated and work harder since reduction of simple repeated works.

Every month saving labor cost for you

10. Operators can work with the machine under the most safety condition with safety switch.

Our company mainly produces full-automatic PE end belt baler, supporting the delivery logistics system of full-automatic baler.

The processing speed of TC-1000A double-rope binding machine is 13 bales per minute. The machine is economical and practical in changing digital orders.

TC-1000B double rope binding machine has a processing speed of 23 bundles per minute. The machine is compact in structure, driven by servo motor. The key action point of the machine head is centralized lubrication with tubing. It can work reliably and steadily for a long time. The change of orders is simple and fast.

The processing speed of TC-500C single rope binding machine is a special binding machine developed by our company for Taobao Box No. 5-12. The machine is compact, driven by servo motor, memory for single function, practical and durable.

我司主要生产全自动PE结束带打包机, 配套全自动打包机的传送物流系统。

TC-1000A型双绳捆绑机处理速度13捆/分钟, 该机数字换单经济实用。

TC-1000B型双绳捆绑机处理速度23捆/分钟, 该机结构紧凑, 采用伺服电机驱动, 机头关键动作点有油管集中润滑, 能长期可靠稳定工作, 换单调整简单, 快捷。

TC-500C型单道绳捆绑机处理速度是我司针对5-12号淘宝箱开发的专用捆绑机。该机小巧, 伺服电机驱动, 记忆换单功能, 实用, 耐用。

The company is composed of a group of professional technician with more than 10 years experiences. We have been adhering to the business philosophy of honesty, responsibility, innovation, excellence. We constantly bring the latest and most effective overall solutions to customers.

Henghao combines the advanced European technologies to domestic packing equipment like packet-based and shaft less drive technology. Our company and European companies have in-depth cooperation to jointly develop a nailing and folder gluer equipment which with higher accuracy, faster speed, and smoother operation. Automatic nailing and folder gluer machine can better satisfy the various needs of customers. It is our consistent aim to provide excellent equipment, reasonable price, and perfect service to our customers. And this is also enables us to establish a good relationship with many customers at home and abroad. In the future development process, Henghao Machinery will continue to provide customers with comprehensive services. Let us go forward together hand in hand to lead the packaging industry in the new trend.

T-MYRP-1060High Automatic Hot Deep Embossing & Foil Stamping & Die-cutting & Stripping Machine has 4 functions in one machine. It is a new model machine, which is extremely advanced technology. Customers can use this machine to do paper deep embossing process, or it can also do automatic foil stamping process. Finally, you can also use it on paper diecutting process and foil stamping process. This machine can finish double press only in one step. So it will observably improve the paper die-cutting and foil stamping process efficiency.

T-MYRP-1060High双机组全自动热压纹烫金模切清废一体机,同时也是双机组,可以实现烫金或压纹等表面处理工艺和模切清废工艺同时一次性在一台机器上完成。1060High系列型号产品属于加重型系列机器,比传统烫金机的机身更重,压力更大,达600吨。采用西门子主电机及控制系统,并且,运动控制系统采用全伺服控制,套印精准度高。本机的压纹深度为国内首创。本机型是全自动平压平单张纸的自动热压纹烫金模切机,集中4种功能到一台机器上。在这台机器上,用户可以进行纸张的自动深压纹、凹凸压痕,或者自动烫金,也可自动模切,并且清废。适用于各种高级精细的精品礼盒包装制品,如:酒盒、烟盒、药盒、化妆品盒、小家电盒、礼品盒,等等。

Tangshan Shengjing Printing Machinery Manufacturing Co., Ltd. is a professional manufacturer of flute laminator. Flute laminator products are divided into three series: FMB series five ply flute laminator, Q series automatic flute laminator and B series semi-automatic flute laminator. The company adheres to independent research and development, constant improvement, with customer needs as the guide.

In 2017, the company independently developed a patented product - FMB series automatic five ply flute laminator. This machine opens the precedent of domestic and foreign flute laminator equipment, which turns the idea of one printed face paper with one or two corrugated papers lamination into reality. The machine has the features of reasonable design, simple structure, convenient operation, long life and good performance, which can replace the function of the five-layer corrugating line.

Automatic Foil Stamping & Die-cutting Machine is widely used for the die-cutting, creasing, foil stamping, cold and hot embossing of cigarette box, drug box and label in the packaging and decoration industries. The machine adopt the high technology to realize the fully automatic feeding, diecutting, stamping, delivery, up-press, down-press, leap step, counting, heating, pre-heating, obstacle indicating, checking and measuring. With the feature of easy operation, reliability, high speed, pressure and precision.

Automatic flat-bed die-cutting machine with front edge lead feeding, adopting high intensity gripper bars, with advanced gripping mechanism, thus adapting to different kinds of corrugated board; independent design of front and rear positioning mechanism side positioning device makes the die cutting precision more stable and accurate; The H/M interface displays working speed of the machine, quantity of processed sheets, total running time; monitoring the input and output points of the PLC make operation more convenient. Adopting frequency inverter to control the main motor, achieving stepless speed regulation and stable operation, low noise and energy saving. The machine has a characteristic of high pressure and high registration accuracy. Also sensors and safety devices in whole machine ensure the normal running and personal safety. The machine has passed ISO9001 quality system certification and meets EU CE safety standards.

参展商产品与服务简介

Automatic folder gluer is mainly used for cartons and boxes manufacturing in the packaging and decoration industry. Whole machine achieves full automation of paper feeding, correcting, pre-folding and gluing, bottom locking, down gluing, final folding, pressing, conveying and collecting.

This machine is safe and stable, intelligent and human friendly, easy to operate, safety protection is well established, and all electrical appliance complies with CE safety standards. There are many innovations overall whole machine.

Window Patching Machine is widely used in the film patching to be package with or without the window of the phone box, wine box, napkin box, cosmetic box, toy box, milk case, card etc. It can be used for the function of the paper gluing, film patching, film cutting of card 200-500g/m² and Corrugated paper within 7mm thick.

Plastic Handle Machine is newly developed machine, with the independent intellectual property, with advanced technology level, the automation control, operation is convenient and easy, safety and reliable, suitable for the kinds of paper box, plastic handle working, especially for the milk case, drink case, wine case etc.

全自动烫金模切机，主要用于包装装潢工业中红盒、纸箱及商标等产品的模切、压痕、烫金及冷热压凹凸，是用户理想的模切烫印设备。本机实现给纸、模切、烫金、收纸、收箔、升压降压主、电化铝步进、跳步、计数、加热、预热、故障显示、故障检测等过程的自动化。具有操作方便，安全可靠、速度高、压力大、精度高等特点。

全自动平压清废模切机带前缘送纸，本机采用高强度航空铝合金叼纸牙排，配合先进的开牙叼纸机构，能适应各类瓦楞纸的不同需求；本机独立设计的前后定位及侧定位装置使模切精度更加稳定准确；本机应用“人机介面”显示机器的工作速度、加工张数、机器总的运行时间和工作状态；对可编程控制器的输入点、输出点及各种故障状态监控，使排除故障及操作非常方便。采用变频器控制主电机，无级调速，运行平稳，噪音低，省能源。本机压力大，套准精度高，多处设有传感器和安全装置，保证机器正常工作和人身安全。该机通过ISO9001质量体系认证并符合欧盟CE安全标准。

全自动糊箱机该机主要用于包装装潢工业中的纸盒、纸箱制品的糊盒、糊箱作业。本机实现了从给纸、折角上胶、钩底、底贴上胶、本折、压着、输送及横向输送收纸过程的自动化。我们在设计开发中本着稳定、耐用、安全、人性化、操作方便的设计理念遵循欧盟CE安全标准，对机器的整体框架结构及多处主要结构作了重大创新，对安全防护做仔细的改进，因此，机器性能更加稳定、操作更加安全方便。

贴窗机适用于对手机盒、酒盒、礼品盒、餐巾纸盒、化妆品盒、儿童玩具盒、服装盒、奶箱、贺卡等有窗口或无窗口的包装类的纸品进行贴膜加固。适应的卡纸200-500g/m²，适应牛皮纸 $\leq 250\text{g/m}^2$ ，本产品实现了自动在经模切后糊盒/箱前进行纸板上胶、贴膜、膜片开口（选配）、整理的功能。

穿塑料提手机是我公司自主研发开发的一款新产品，具有独立的知识产权，具备先进技术水平，整机自动程序化控制，机、光、电、气融为一体，操作简单方便，安全可靠，适应各类纸制品箱、盒的塑料提手穿插作业，特别是奶箱、饮料箱、食品、酒盒、玩具盒等的片状产品。

Company profile:

Yutian County Kestar Printing Machinery Manufacturing Co., Ltd. is located in Yutian, Hebei province, which is known as "the hometown of printing machine in north China". It is an enterprise including design, manufacture, sales and service. After more than ten years of development, the film & flute laminators and other machines not only sell well throughout domestic but also exported to many foreign countries. "Strive to make the customer's imagination into reality" is the goal that Kestar people always pursue.

CGFM Servo Type High Speed Laminating Machine:

The machine is perfectly combined with the motion control system and the servo correction system. It uses multiple sets of high-precision photoelectric sensors to track and position the paper, and corrects the paper through the servo motor to achieve accurate positioning of the surface paper and the bottom paper. It has many advantages such as high speed, high precision, convenient operation, etc. It is an indispensable equipment for color printing and packaging users.

GFM Series Automatic High-speed Laminating Machine:

This machine is designed for water-based glue, can also be used for oil glue, pre-coating film and non-glue film, one machine for four functions. The machine adopts electromagnetic heating system, heating fast, stable and accurate temperature control, humanized design concept makes the operation simple and convenient. Many patent designs make the machine favored by the majority of users.

公司简介:

玉田县科思达印刷机械制造有限公司坐落于有着“中国北方印机之乡”美誉的河北玉田。是一家集研发、制造、销售、服务于一体的企业。公司历经十几年的发展历程，其生产的贴面机覆膜机等印后设备不仅畅销全国还远销国外。“努力让客户的设想变成现实”是科思达人永远追求的目标。

CGFM系列伺服型高速贴面机:

该机采用运动控制系统与伺服纠偏系统完美结合，利用多组高精度光电传感器对纸张进行跟踪定位。通过伺服电机对纸张进行纠正，已达到面纸与底纸的精确定位。本机具有速度快、精度高、操作方便等诸多优点。

GFM系列全自动多功能高速覆膜机:

本机是针对水性干覆胶水所设计的机型。亦可用油性胶水及预涂膜和无胶膜，一机四用。本机采用电磁加热系统，加热速度快，控温稳定准确，人性化的设计理念，使操作更简单方便。多项专利设计使本机型受到广大用户的青睐。

提高工作效率是人工的10倍, 不受外部气候、环境影响都可以正常生产各种单张纸天地盖纸盒。

本机操作简单、可靠, 可以生产市场上已有的各种瓦楞纸或裱卡纸, 天地盖纸盒规格无需变更现有的模切刀版。可以节约生产成本和工作效率。

设备可以生产前后软边的瓦楞纸、自带自动折边、自动喷胶系统。低能耗; 每小时耗电在7度左右, 高效率; 最快50只/每分钟, 需要胶水质量配合生产。瓦楞纸标准生产45-50只/每分钟, 350g以上纸张纸标准生产40-45/只每分钟(原有速度最快; 32只/每分钟)。极低的报废率; 千分之3-5只。

不改变设备任何零部件情况下, 可以立即生产目前市场上99%的各种单张纸天地盖纸盒。

中文: 企业的宗旨: 志存高远、品牌炬兴、拼搏务实、诚信炬兴。这些年“炬兴”创造的经典:

2007年基于半自动模切机平台,创新推出“二次定位”结构,使生产效率提升了约10%。

2009年继续推出不停机补纸机构,使整机的效率再次提升约10%。

2010年优化全自动卡纸对裱机结构,使之产品的加工范围更能适应绝大部分用户。

2012年创新研发高速裱纸机,机器时速突破12000张,贴合精度 $\pm 1\text{mm}$ 。

2014年首创推出双平台供纸机构,降低了全自动模切机整机安装的难度,大幅提升了操作者的舒适度。

如今“炬兴创造”仍在继续,敬请持续关注!

媒体与服务商简介

The trade fair CCE International focusses solely on manufacturing and converting corrugated and cartonboard. It has firmly established itself as a specialised meeting point for this industry. The 4th edition will take place from 12 to 14 March 2019 at the Munich Trade Fair Centre, Germany.

Some 150 exhibitors will welcome visitors on 5,000 sqm net exhibition space at CCE International 2019. They will present their latest technology trends, production processes, machinery and services, covering the entire production chain of the corrugated and folding carton industry, through live demonstrations.

Visitors are buyers and users of machinery, accessories and services looking for innovative solutions for the production and converting of corrugated and cartonboard. In 2017, 2,130 industry professionals from 67 countries visited CCE International.

In addition to live demonstrations by the exhibitors, CCE International will, once again, present free daily seminars in 2019. The successful seminar programme will focus on "Digital Print", "Sustainability" and "Innovative Converting Techniques".

As a visitor of CCE International 2019, you will discover the many innovations of the booming corrugated and folding carton industry and gain valuable competitive advantages!

Taiwan Paper Containers Industry Association (TPCIA) was established on Dec. 9th, 1965 with 24 charter members. In 1966, the Production & Marketing Technology Improvement Group was set up for improving the quality of paper containers.

On 1st, May 1994, the linear measure of paper containers changed into centimeter. From June of the same year, TPCIA became the official member of ICCA.

In Dec. 2001, given some political concerns, TPCIA adopted the modified title, Chinese Taipei Corrugated Case Association, for international issues, but TPCIA keeps effective locally.
